

600L Pump Chamber

SKU: PC600-V

Ideal situation:

- When a pump chamber is needed for a failed septic tank disposal
- Where a bathroom or toilet is added to an existing building with in ground pipework
- A tiny home or temporary accommodation needing to pump to onsite services
- Stormwater applications

The 600L pump chamber is ideal for where a medium sized pump chamber is needed, and consists of a high-quality polyethylene tank ideal for collecting sewage or stormwater. These chambers are certified and can be consented through council, if needed.

The chamber comes with the pump already installed inside the tank, which is an industrially rated vortex pump that allows the sewage or stormwater to be sent to the sewer or storage tank, depending on the application.

A high-level alarm is also installed, and this will give an early warning of any pump problem.

The chamber can be completely buried, if needed, and lid risers are also available.

Chamber dimensions: 890mm in diameter x 1080mm high

Pump Specs: 0.75kW, 4.8 amps, 7.8m max head, 400L/min max flow

Optimal pumping range: 200L/min @ 5m head
